MSDS PRODUCT INFORMATION

Date: 10/07/2005
To: MSDS Requester
From: 3E Company
Subject: The MSDS you have requested

☒ MSDS NOT REQUIRED

In response to your request for a Material Safety Data Sheet, according to the OSHA Hazard Communication Standard (Right-to-Know), the following item is an article. Articles are defined in 29 CFR 1910.1200(c). Products such as Drugs, cosmetics, food, or alcoholic beverages, wood or wood products, and tobacco or tobacco products, as defined in 29 CFR 1910.1200(b)(6), are exempt from the Hazard Communication Standard. Items that are considered articles, as defined in 29 CFR 1910.1200(c), are also exempt from this Standard. Therefore, the manufacturer is not required to provide an MSDS for this product.

☐ MSDS DISCONTINUED PRODUCT

In response to your request for a Material Safety Data Sheet, the manufacturer has discontinued the product listed below. The MSDS Attached is the most current version, or an MSDS is no longer available.

☐ MSDS BEST COPY AVAILABLE

The MSDS attached is the best copy available from the manufacturer.

☐ MANUFACTURER NO LONGER IN BUSINESS

In response to your request for a Material Safety Data Sheet, a current MSDS could not be obtained for this product. It has been determined that the manufacturer listed below is no longer in business. A current address and phone number could not be located.

Manufacturer: Square D Company
Product Name: Square D Products

Dear Mr. Stevenson:

Material Safety Data Sheets are not available for our products.

The OSHA Hazard Communication Standard applies to any chemical which is known to be present in such a manner that employees may be exposed under normal conditions of use or in a foreseeable emergency. "Exposure" occurs when an employee may inhale, ingest or absorb a hazardous chemical during the course of employment.

Articles are excluded, under the scope of the Standard, from being covered as a chemical. **Our products would be defined as articles.** The only exceptions would be chemicals shipped with our products such as transformer oil, lubricants, or touch-up paint, and in these cases an MSDS would be provided. The above definitions were obtained from the Federal Register Vol. 48, No. 228, Nov. 25, 1983, p. 53335.

The Federal Register, Vol. 55, No. 96, May 17, 1990, p. 20583 provided the following clarification:

There must be a potential for worker exposure to the hazardous chemical for the standard to be applied (Paragraph [b]). Mere presence of the chemical in the workplace does not result in coverage -- it must be available for exposure. For example, equipment being used in the workplace may be composed of hazardous metals such as chromium or nickel. However, if the chromium and nickel are bound in the product in such a way that employees cannot be exposed to the chemicals during use, they are not covered.

If you have any additional questions, feel free to contact me at (847) 397-2610 ext. 3398.

Very truly yours,

Richard Widdowson
Director - Safety Health & Environmental Affairs
